EUSTIS RIDGE, MAINE

WEATHER CHURCH

This church has roof and steeple BLUE
When skies are fair and clouds are few;
Their color turns to PINK, you'll see,
For rain or high humidity;
But when they have an ORCHID hue,
Then you'll know a change is due.

Place near Window or Door — Away from Heat #5

This card is a hygroscope with surprising accuracy in forecasting weather. It is intended for indoor use but for best results must be placed where it will have access to outside air. IMPORTANT: SPRING, SUMMER and AUTUMN the card functions well anywhere. In WINTER it may remain constantly blue unless placed in the air space between window and storm sash, in an outside foyer or enclosed porch in an automobile, etc.
